## **DETAILED ACTION**

## Allowable Subject Matter

Claims 24-35 are allowed.

The following is an examiner's statement of reasons for allowance:

- 1. Regarding claim 24, the prior art of record fails to show a rigid link attached to the child seat structure solely by a coupling mechanism that permits angular movement of the child seat structure relative to the rigid link about an axis located above the base support surface, and wherein the rigid link is connected to the child seat structure by both a first auxiliary link which has one end attached to the child seat structure by a first pivot joint and another end attached to the rigid link by a second pivot joint and a second auxiliary link which has one end attached to the child seat structure by a third pivot joint located above the first pivot joint and another end attached to the rigid link by a fourth pivot joint located below the second pivot joint, and a releasable connector mounted on the rigid link for engagement with a standard anchorage unit associated with the vehicle seat, in combination with other specifically claimed features;
- 2. Regarding claim 26, the prior art of record fails to show a rigid link projecting from an end of the child seat structure opposite to the backrest portion and attached to the child set structure solely by a coupling mechanism that permits angular movement of the child seat structure, when in use relative to the rigid link about a link axis located above the base support surface, and a releasable connector mounted on

the rigid link for engagement with a standard anchorage unit associated with the vehicle seat, in combination with other specifically claimed features.

Page 3

- 3. Regarding claim 30, the prior art of record fails to show a rigid link projecting from an end of the child seat structure opposite to the backrest portion and attached to the child seat structure solely by a coupling mechanism that permits angular movement of the child seat structure relative to the rigid link about a link axis located above the base support surface, and a releasable connector mounted on the rigid link for engagement with a standard anchorage unit associated with the vehicle seat, and sop means arranged to restrict the extend of angular movement of the child seat structure relative to the rigid link in a direction such that the bottom of the childe seat structure moves towards the releasable connector, in combination with other specifically claimed features.
- Regarding claim 33, the prior art of record fails to show a link projecting 4. from an end of the seat portion of the child seat structure opposite to the backrest portion and attached to the child seat structure solely by a coupling joint located above the support surface so as to permit angular movement of the child seat structure relative to the link when the safety seat is in use, and a releasable connector mounted on the link for engagement with a standard anchorage associated with the vehicle seat, in combination with other specifically claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Art Unit: 3636

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Milton Nelson, Jr. whose telephone number is 7033082117. The examiner can normally be reached on Monday-Friday 5:30-3:00.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
